

# CSTM COMMUNIQUE

**September 2020:** CSTM is introducing an exciting new chapter in communication. Welcome to the first edition of the CSTM Communique, a regular email newsletter which will allow CSTM to streamline communication, connect with the transfusion medicine community, and provide access to interesting information.

## **New educational resources**

If you weren't able to participate in the IVIG-Associated Hemolysis Webinar that was sponsored by CSL Behring for CSTM on May 29th 2020 it is now available on the CSTM website. The unabridged version is available in the members only section at [Unabridged version](#). An abridged version is also available to non-members at [Abridged version](#).

A special thanks goes out to CSL Behring for providing the webinar and for their continuing support of CSTM educational activities which are vital to improving transfusion medicine knowledge.

## **Discussion Forum: TSO mailing list**

We would appreciate your suggestions to rebrand the "[TSO mailing list](#)" to ensure that the transfusion medicine community is aware of its value and that all are welcome to join in to ask questions and share their knowledge. Please [click this survey link](#) to submit your suggestion(s). Click TSO list blog for more information on the [TSO Mailing list](#).

## **Recent blogs**

The CSTM is pleased to announce that Eric Ching's blog, "[Reasons for Inconclusive Antibody Identification](#)" is now also available in French. Eric is a well-respected immunohematology specialist who is never happier than when he is working on a difficult serological problem. He loves to share his expertise and exchange case histories with technologists anytime. He has been a mentor and friend to many in the Canadian transfusion community. .

## **Thank you to our Sponsors:**

Thanks to our [Gold sponsor Grifols](#) for supporting CSTM.

Stay tuned! More interesting material on the way!
